Summary

Backend developer skilled in Python, Django, REST APIs, and MySQL, with experience building secure and scalable server-side applications. Strong understanding of authentication systems, database-driven architectures, and cloud deployment workflows. Hands-on experience across backend development, machine learning integrations, and production-focused systems. Adept at problem-solving, writing clean code, and designing efficient backend solutions.

Skills

Languages: Java, Python, JavaScript
Development: Django, Django Rest Framework,HTML5/CSS3, React.js, Node.js, Express, Angular, Spring Boot, Restful APIs,
Mobile Development: Flutter(Android + IOS), React Native, Json Handling, Push Notification
Databases: MySQL, MongoDB, PostgreSQL
Tools & Platform: Git, AWS, Postman, SaaS products, OOPs, Design Pattern, System Design
Soft Skills: Communication, Team Leadership, Problem Solving, Time Management, Punctuality, Public Speaking

Work Experience

SoftPro, Lucknow June 2025 – July 2025

- Gained hands-on experience in data preprocessing (cleaning, normalization, feature engineering).
- Applied deep learning techniques (CNNs, RNNs, LSTMs, Transformers) for image and text data.
- Deployed ML models using Docker Kubernetes for scalable production environments.
- Recommendation Systems, Time Series Forecasting (ARIMA, Prophet, LSTM), Graph Neural Networks.
- Gained practical exposure to professional etiquette, teamwork, and personal branding.

Education

Noida Institute of Engineering And Technology, Greater Noida, Uttar Pradesh Aug 2022 – Aug 2026 (Expected)
B.Tech in Computer Science and Engineering with AIML CGPA: 7.19/10
Relevant Coursework: OOP, Databases, DSA, OS, Networks, Machine Learning, Deep Learning, Business Development, Finance, Entrepreneurship, Dbms

Projects

- **Attendance Management System using Face Recognition** GitHub
  - Developed a full-stack attendance automation system using **Python, OpenCV, and Firebase** for accurate facial recognition-based tracking.
  - Implemented real-time face detection and recognition with over 95% accuracy using Haar Cascade and LBPH algorithms.
  - Integrated **Firebase Realtime Database** for secure cloud-based storage and instant updates.
  - Designed an intuitive admin and user interface using Tkinter for seamless interaction.
  - Improved attendance accuracy and reduced manual effort by over 70%.

- **Django File Upload Access Control API** GitHub
  - Developed secure file upload and download APIs using **Django** and **Django REST Framework**.
  - Implemented **JWT-based authentication** with user-level permissions and access control.
  - Designed a robust metadata system for tracking filename, size, type, and privacy settings.
  - Ensured secure access by validating file ownership and restricting private file downloads.
  - Integrated **MySQL** for relational data handling and optimized query performance.

Awards & Certificates

- Full stack development with Angular and Spring (Infosys).
- Machine Learning and Deep Learning Specialization (Coursera).
- Introduction to Artificial Intelligence (Coursera).
- Python Essential 1 and 2

Achievements

- Led the AIML branch football team as captain to the college-level finals, demonstrating leadership, teamwork, and strategic planning skills.
- Guided and Led the team to successfully crack the internal Smart India Hackathon, showcasing problem-solving and innovation abilities.
